Career Objective

Passionate about continuous learning and delivering high-quality web solutions. Committed to enhancing user experiences and contributing to innovative front-end development projects. I plan to pursue a degree in Computer Science after one year to further my knowledge

Skills

Front-End: HTML, CSS, Tailwind CSS, JavaScript, React, Figma

Back-End: Node.js, Express

Database: MongoDB, Firebase

Tools: Git, Github, JWT, Vercel, Netlify, Surge, Visual Studio

Projects

• **Blog Sphere** → [Live Site](#) || [Github](#) Dec-24 to Present

Empowering users with insightful, engaging, and dynamic blog experiences.

Key Features :

- Users can add, update, and view blogs with detailed information. Features include filtering blogs by category.
- Allows logged-in users to wishlist blogs, view their wishlist on a dedicated page
- JWT protection for private routes. Error handling ensures user-friendly feedback

Technology: React, JavaScript, Firebase, Node.js, Express, MongoDB

• **Chill Gamer** → [Live Site](#) || [Github](#) Nov-24 to Dec-24

Providing gamers with simple, fun, and engaging game reviews and features.

Key Features :

- • Protected routes like "Add Review," "My Reviews," and "Watchlist" accessible only to logged-in users
- Personal "My Reviews" and public "All Reviews" sections with detailed views.
- Filter games by genre and sort by rating or publishing year.

Technology: React, JavaScript, Firebase, Node.js, Express, MongoDB
